Preface

Journal of Intelligent Computing and Health Informatics (JICHI) is a specialist academic journal, publishing research articles and review reports article like systematic literature reviews in English in Intelligent Computing and Health Informatics domains. Its primary target is research of interest in Indonesia or published by Indonesian researchers, however, all quality contributions of authors in all the world are considered. All research articles submitted for publication are rigorously refereed by independent peer reviewers. The journal publishes original work that is of international stature. The editorial board comprises local and international scholars of high repute. The journal is published online using the open-access model, making papers accessible in developing countries where funding to subscribe is scarce.

The purpose of this journal is to honor myself and all colleagues around the world who want to collaborate closely to contribute to extensive research and enrich the field of Intelligent Computing and health informatics. This domain presents an appropriate research approach to develop high-level skills that will encourage various researchers with relevant topics, encourage their natural creativity, and prepare them for independent research projects. We think this journal is proof of benefits and possibilities of future collaboration that contribute to mutually agreed-upon knowledge.

Best Regards,

Ahmad Ilham

Editor-in-Chief, Journal of Intelligent Computing and Health Informatics

Contents

Titles	Pages
<i>Researchers</i>	
A Linear Regression Model for Deploying a Cognitive Web for an Inventory Prediction System <i>Yenni Fatman, Sali Alas Majapahit, Muammar Ramadhan</i>	1-8
Part of Incomplete Medical Record Documents: Literature Review <i>Indrayadi Indrayadi, Hastin Atas Asih</i>	9-13
Non Contact Temperature Monitoring System to Optimize Health Working Environment Based on IoT <i>Luki Ardi Ardiantoro, Moh Muslimin, Yesy Diah Rosita</i>	14-19
The Role of EEG Signals: SVM Classification of Cognitive Load as a Support for UX Evaluation <i>Ennu Intan Iksan, Murein Miksa Mardhia</i>	20-26
Mapping Religious Harmony in the Special Capital Region Jakarta using K-Means Algorithm <i>Deden Istiawan, Wellie Sulistijanti, Arif Gunawan Santoso, Windyaning Ustyannie</i>	27-34
