Preface

Journal of Intelligent Computing and Health Informatics (JICHI) is a specialist academic journal, publishing research articles and review reports article like systematic literature reviews in English in Intelligent Computing and Health Informatics domains. Its primary target is research of interest in Indonesia or published by Indonesian researchers, however, all quality contributions of authors in all the world are considered. All research articles submitted for publication are rigorously refereed by independent peer reviewers. The journal publishes original work that is of international stature. The editorial board comprises local and international scholars of high repute. The journal is published online using the open-access model, making papers accessible in developing countries where funding to subscribe is scarce.

The purpose of this journal is to honor myself and all colleagues around the world who want to collaborate closely to contribute to extensive research and enrich the field of Intelligent Computing and health informatics. This domain presents an appropriate research approach to develop high-level skills that will encourage various researchers with relevant topics, encourage their natural creativity, and prepare them for independent research projects. We think this journal is proof of benefits and possibilities of future collaboration that contribute to mutually agreed-upon knowledge.

Best Regards,

Ahmad Ilham

Editor-in-Chief, Journal of Intelligent Computing and Health Informatics
Department of Informatics, Faculty of Engineering

Contents

Titles	Pages
<i>Researchers</i>	
Optimizing Medical Image Security Using Combined DWT-DCT-SVD Watermarking and RLE Compression Strategies <i>Adiyah Mahiruna, Ngatimin Ngatimin, Lathifatul Aulia, Ahmed Kareem Oleiwi, Eko Hari Rachmawanto</i>	1-7
Padang Cuisine Classification using Deep Convolutional Neural Networks (CNN) and Transfer Learning <i>Elvina Sulistya, Fanni Tyasari, Anisa Ismi Azahra, Muhammad Munsyarif</i>	8-15
Evaluating User Satisfaction with Hospital Management Information Systems: A PIECES Framework Analysis at Wates General Hospital <i>Ulya Frista Ferdiana, Angga Eko Pramono</i>	16-24
Agricultural Pest Detection with EfficientNetV2-L and Grad-CAM: A Comprehensive Approach to Sustainable Farming <i>Denaya Ferrari Noval Agatra, Barisma Ami Cornella, Muhammad Muza'in, Muhammad Munsarif, Jafar Abdollahi, Ahmad Ilham</i>	25-34
Enhancing Early Diagnosis of Heart Disease: A Comparative Study of K-NN and Naive Bayes Classifiers Using the UCI Heart Disease Dataset <i>Angga Aditya Permana, Arsanah Arsanah</i>	35-42
